LONGi Solar Company Presentation

LONGi

About LONGi

The world's leading solar technology company

LONGi leads the solar PV industry to new heights with **product innovations** and **optimized power-cost ratio** with breakthrough monocrystalline technologies. LONGi supplies more than **30GW** of high-efficiency solar wafers and modules worldwide yearly, about **a quarter of global market demand**. LONGi is recognized as the world's most valuable solar technology company with the highest market value. **Innovation and sustainable** development are two of LONGi's core values.

Leadership

World's leading capacity of monocrystalline solar products

World's record for **P-Type monocrystalline** cell and module efficiency. World's largest scale in monocrystalline silicon wafers, monocrystalline modules and bifacial modules deliveries. World's healthiest solar company in financial strength, according to the latest BloombergNEF report. LONGi demonstrates its leadership in the PV industry in energy transformation. LONGi's products fulfilled **15% of new energy installations** in the world each year, and is the **world's largest supplier of power generation equipment in the PV sector**.

40%

Total capacity of monocrystalline silicon wafers, ranked No. 1 worldwide in 2019

9.08GW

Total shipment of monocrystalline cell and modules in 2019

10.0GW +

Total shipment of bifacial modules, ranked No.1 worldwide by 2020.11

BloombergNEF

Altman-Z Score 4.99 highest of all manufacturers
(Bloomberg NEF 4Q-2020 PV Outlook,)

AAA Rating in the new PV ModuleTech Bankability
(AAA is currently the highest rating, and LONGi is the only one in this level)

Leadership

Industry leading financial health

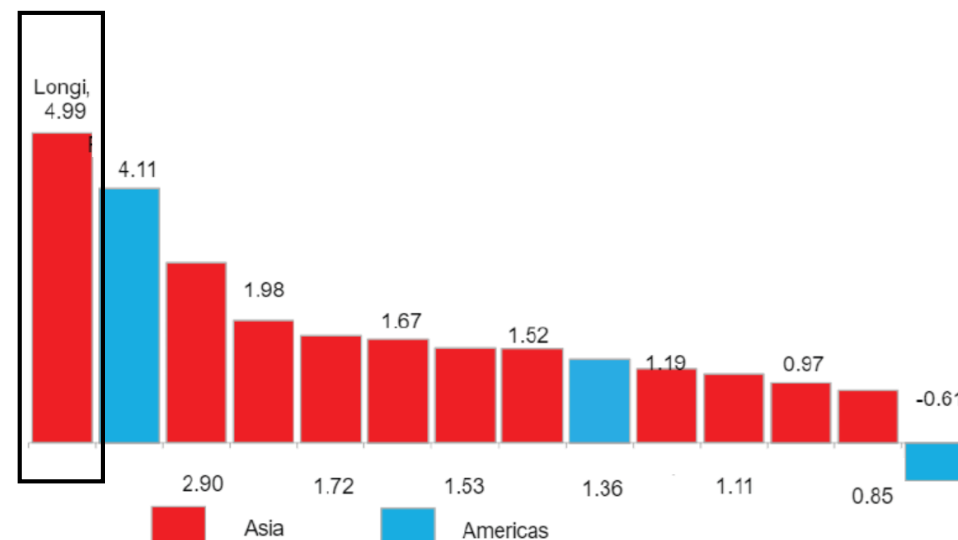

Adhering to the philosophy of **stable operation** and **sustainable development**, LONGi has maintained a low asset-liability ratio through the years. The strong return on asset, **good profitability** and **proven bankability** has been validated and recognized by industry authorities.

Table: Photovoltaic module manufacturers meeting BloombergNEF's tier 1 criteria as of 4Q 2020

Firm/ brand	Annual module capacity, MW/year	Firm/ brand	Annual module capacity, MW/year
ZNShine	5,000	Leapton Energy	600
Waaree*	2,000	Jolywood*	3,000
VSUN Solar*	2,100	Jinneng/ Jinergy	2,700
Vikram Solar	1,200	Jinko*	25,000
Ulica Solar	1,000	Jetion	2,500
Trina Solar*	21,500	JA Solar*	15,000
Talesun*	7,000	HT-SAAE*	1,500
Swelect	140	Hengdian DMEGC*	1,600
Suntech	10,000	Heliene	390
SunPower/ Maxeon*	2,800	Hanwha Q-Cells*	10,700
Sumec/ Phono Solar*	2,000	Hansol Technics	600
Shinsung	300	Haitai New Energy	5,000
Sharp	210	Goldi Solar	500
Seraphim / SEG*	5,000	GCL System*	7,200
S-Energy	530	First Solar*	6,500

A-share market listing

2014

World's No.1 in production of monocrystalline silicon wafer

- RCz Ingot pulling
- Diamond Wire Slicing Technology
- M1/M2 Silicon standard

History

Propelling the transformation

From its humble beginnings in Y2000, LONGi progressed from the first era of developing expertise in semiconductor technology, to the 2nd era of promoting technological innovations in monocrystalline silicon wafers; then to the 3rd era of promoting monocrystalline to the mainstream and finally to today's new era of using solar energy technology to re-green the earth's ecology. Every of **LONGi's successive technological innovations** brought about **industrial transformations**.

2015~2018

Era: Promoting Monocrystalline to the Mainstream

2015

Entered solar cell and module market
World's No.1 in shipment of monocrystalline module

2018

The world's most valuable PV manufacturer

- PERC Trend
- LIR Technology
- Bifacial Technology

2018~Current

Re-Greening Earth's Ecology with Solar Energy Technology

2019

Certified the low carbon footprint by CERTISOLIS
Set another standard for ultra high efficiency module

- M6 Silicon Standard

2020

Set a brand new industry standard

- M10 Silicon Wafer Standard

Selected as Sole Photovoltaic Sponsor for China Pavilion at Dubai Expo 2020
Officially joined the Climate Group's RE100, EV100, EP100 initiative to achieve carbon neutrality

History

Propelling the transformation

With every milestone achieved, LONGi has driven the industry forward, **propelling the transformation** of the PV industry through innovations and sustainable developments.

Global Reach

Real-time solutions for local markets

Customer satisfaction is one of LONGi's core values. LONGi has photovoltaic manufacturing bases for **global scale in production** and a **worldwide marketing network** that provide customers with **localized services and support**, such as project design, product specifications, cooperation planning, business support, logistics and on-site services.

Product Portfolio

Industry Benchmark

From standard monocrystalline, PERC monocrystalline, bifacial, to the Hi-MO 4 modules with the new M6 (166mm) wafer, every of LONGi's new product spearheads **the transformation of the PV industry**.

Hi-MO Series | Leading the industry with Mono PERC technology

Hi-MO 4

Higher power, lower LCOE

LONGi Hi-MO 4 series products are monocrystalline bifacial modules using the new **M6 (166mm) silicon wafer** that delivers the highest power in the modules. LONGi's advanced R&D technology led the upgrade of silicon wafer size from M2 to M6, and ushers in the era of the 166mm standard. LONGi M6 silicon wafer technology enhances the power of the modules, with front side power up to **450W**. The results are BOS savings and the lowest LCOE for the photovoltaic project.

Leading the era of M6 standard

- Backside power generation gain
- Good electrical performance under shaded conditions
- Resistant to hot spots
- Adapt to high temperature and high radiation environments

Hi-MO 4 is available in bifacial and monofacial (Hi-MO 4m) variants

Hi-MO 5

Delivering true value

LONGi optimized gallium-doped M10 standard silicon wafers (182mm) to produce a P-Type Mono PERC module with the lowest LID, increased attenuation and power performance as well as long-term reliability.

Hi-MO 5 adopts “Smart Soldering” which uses integrated segmented soldering ribbons that maximize light capture and connect cells with reduced gap distance and reduce the tensile stress of the cell.

- M10 wafer with gallium-doped technology
- P-PERC cell technology
- Half-cut cell with multi-busbars
- 72-cell format

Bifacial Technology for Hi-MO series

No. 1 in bifacial modules worldwide shipments

The highest cost-performance ratio of bifacial modules is achieved with **P-type mono PERC technology** of which LONGi has led in large-scale commercialization.

Bifacial Technology for Hi-MO series

No. 1 in bifacial modules worldwide shipments

Bifacial modules' low attenuation, high rearside energy and the **additional albedo gain** provide the optimal cost-performance ratio, making this one of the standardized product types today. As of November 2020, LONGi's shipments of bifacial PERC modules have exceeded **10.0GW**, ranking **1st** in the world.

 Additional power gain from bifacial module based on background type (%)

Quality

Proven Value

High power generation and **excellent reliability** throughout the product life cycle are fundamental to LONGi's products. From silicon wafer technology with lowest degradation to module design technology that can resist the harshest environments, LONGi tests product quality rigorously and validate them independently. LONGi works with third-party organizations, set up demonstration power stations around the world and continuously tracks the performance of every product in their lifecycle.

LONGi offers a first-year power warranty of $\geq 98\%$ for PV modules

LONGi's global demonstration power plants

Quality

Proven Value

In addition to standard tests, LONGi's photovoltaic products demonstrated **excellent performance** in rigorous stress tests conducted by independent third parties.

Ranked first in TÜV Rheinland PV module power generation simulation for two consecutive years 2016, 2017

First place in TÜV Rheinland PV energy simulation in the Monocrystalline group in 2018

RETC 2019 High Achievement Manufacturers

First rank in empirical power generation in PV Magazine outdoor power generation evaluation

Highest score in Module manufacturing technology (2019, PV-TECH)

Top Performers for All extended reliability tests

Innovations

Continuous technology innovations on open platforms

LONGi's innovations are not just limited to technology. The company hopes to **integrate innovations and create an open, collaborative platform**. This is essentially a new way to connect with industrial partners, universities, research institutes, PV start-ups, as well as customers and colleagues. In a **ecosystem**, all elements come together in active collaboration and interaction that enables us to design **innovative solutions** to drive **the solar-led energy transformation**.

The Future of LONGi

Expansion to meet the needs of energy reform

Solar power has become the largest new source of electricity installed each year since grid parity is achieved in many regions. **The trend is accelerating.** As the pace of transition from fossil fuels to electricity increases, the world's demand for electric energy is also undergoing a new round of transformation. In order to meet this strong, continuous demand brought by the energy transformation, LONGi has made **an ambitious capacity expansion plan**, adhering to the business philosophy of "**leading, expanding production with advanced technology**", where every new production capacity is a new upgrade of product technology.

The Future of LONGi

Sustainable Development Strategy

With “Solar for Solar”, LONGi officially joined the Global Initiative RE100, EV100, EP100, and will keep building towards achieving **100% in clean energy consumption**. LONGi always had **sustainable management** as a core criteria for business decision-making, including continuous investments in innovation and research, advocating an open corporate culture and promoting scientific institutional research. At the same time, LONGi has been leading continuous changes in electric power and energy, promoting the **sustainable development of the planet and mankind**. It is LONGi’s vision and roadmap that Earth will be completely green and self-sustainable in the first half of this century.
